

Product: SUPA Roller Deglaze Paste

Category: Pressroom chemicals

Technical Information

Description	A conditioning and cleaning paste for inking rollers. It can be used on sheetfed presses using both conventional and UV ink. However, it is not suitable on presses equipped with EDPM rubber rollers.
Storage & Handling	Store in a cool dry area, away from sunlight. Always keep the containers tightly closed when not in use. Check the safety data sheet for correct PPE.
Packaging	0.7kg Can.
Precaution	Keep away from sources of heat, sparks, open flames and static electricity charges. Supa Gum Washout should not be left on the image areas without buffing down for prolonged periods. Post wash-up with water ensures best results.

Properties

- Removes ingrained ink, glaze and other build up from the rollers.
- Removes calcium and other mineral build up from the surface of the rollers.
- Enhances the ink distribution and ink transfer properties of the rollers.
- Conditions and rejuvenates the roller surface without causing damage or swelling of the rubber.
- Does not cause damage or swelling of the rubber rollers.
- Has a mild odour.

Usage Instructions

Wash ink off rollers and/or blanket using a quality wash.

Apply Super Roller deglaze paste to the surface of the rollers and then allow the machine to idle for a short time. This ensures the paste is adequately distributed over the roller surface.

Leave paste on for 5-10 minutes and removes is using a cloth. Any this layer of paste remaining on the rollers can be removed using a quality wash.
