## **Supa Rejection Effect varnish 1290**

This kind of varnish was conceived especially to achieve a matt-brilliant effect in combination with Aqueous & UV coatings.

Effect varnish 1290 can be used like a conventional printing varnish in the printing unit.

The printing areas that shall appear matt on the printed product will be overprinted with the effect varnish 1290, the Aqueous /UV varnish will be printed inline immediately afterwards and then both layers can harden.

Depending on the quantity of effect varnish that is used, a matt-effect at low film weights through to a reticulation effect at high film weights.

To be used in conjunction with the Acrylac Gloss 1100 / New V High Gloss UV to obtain optimum results.

## **Printing Additives:**

Monsun Drier  
Paste Reducer  
Code No 107003 2.5kg Tin
