

Product: SupaMax Xtra

Category: Printing Blankets

Features

- Ground and buffed quick release surface enhances ink transfer, with minimal dot gain and dense solids.
- Unique, thicker compressible layer provides stability, reduced smashes and less edge cutting, resulting in reduced blanket usage.
- Dual compatibility reduces blanket changing down-time and blanket inventories.
- Reduced piling and linting means less downtime for blanket washing.
- Uniform gauge assures excellent printing consistency.
- Compressible construction assures longer blanket life.
- Smooth surface provides faster wash-ups.
- Defect-free surface means increased production time.

Benefits

- Hybrid top face.
- High tensile strength backing prevents stretching.
- Longer life.
- Resists smashes and sinking.
- Excellent resistance to solvents.

Technical Data

Colour	Blue
Thickness	3 Plies 1.96 Standard +/- .020mm
Description	A buffed compressible quick release printing blanket
Printing Surface finish	Micro buffed
Roughness	1.1 micron
Maximum linear	0.9%
Maximum tensile force	>4500N (DIN 16621)
Compressible layer	Close Cells Microsphere
Application	Sheet fed & Packaging
Ink compatibility	Conventional & Hybrid
